Subject: Mirant Alexandria

Mirant Potomac River Generating Station is Alexandria's #1 polluter. No modifications to the plant should be approved unless it moves the plant to a less polluting status.

The plant is too old to be operating.

The plant does not provide energy to Alexandria.

The plant's use of coal results in noise, pollution, and industrial traffic in what has become a largely urban residential area.

It is time for the state to pressure the company to begin closing down operations.
